- Converts Urea To Ammonia Gas
- Increases Protein By Up To 4.5 Units
- Contractor Friendly
- Increases Digestability
- Fixed Application Rate
- Feed Out After 2 weeks
- Excellent On Farm Results

"We use BerrysCorn to treat our home grown wheat. A fantastic, value for money product which kept extremely well. BerrysCorn has helped produce plenty of high quality milk through the extra protein and pH it has supplied. The consistency of the cows makes it a no brainer and would definitely recommend the use of this excellent product".

Mark Adams, Ward Farm, Torrington, Devon
